

23/06/2025

To Whom It May Concern,

I am pleased to write this letter of recommendation for **Edbert Widjaja**, who interned with me at **Migrasia Global Limited Solutions** from **07/02/2025 to 23/04/2025**. During his internship, Edbert consistently demonstrated professionalism, intellectual curiosity, and a strong work ethic.

As an AI/ML Engineer and Technology Consultant at Migrasia, I had the pleasure of supervising and collaborating closely with Edbert on several key projects. These included implementing and fine-tuning a machine translation application for Bahasa Indonesia speakers—achieving excellent performance—as well as contributing to various AI research projects aligned with our organizational goals. Additionally, Edbert helped update our organization's website by integrating research data and building interactive visualizations using React and Node.js. He also designed a Retrieval-Augmented Generation (RAG) pipeline to support an AI-powered grant application tool, which is now a foundational piece of our internal operations.

Edbert approaches each task with enthusiasm and discipline. He was quick to acquire new skills and always contributed meaningfully to the team. One of his standout qualities is his ability to manage time effectively—balancing internship responsibilities alongside his university coursework and exams. He communicates openly to clarify expectations and demonstrates strong critical thinking in determining how to tackle technical challenges. Edbert is also highly receptive to feedback and shows a genuine eagerness to improve and explore unfamiliar tools and frameworks.

Beyond his technical abilities, Edbert is an excellent communicator and team player. He engages thoughtfully with colleagues, asks insightful questions, and embraces collaboration. I was particularly impressed by his ability to deliver strong results even when working with new technologies for the first time. He is also highly adaptable and open to exploring new ideas and projects, which makes him an ideal candidate for dynamic and innovation-driven environments.

I have no doubt that Edbert will bring the same level of commitment, creativity, and intelligence to any future endeavor. I strongly recommend him for roles in research or AI/ML engineering, and I am confident he will be a valuable asset to any team or institution.

Please feel free to contact me at [salma@migrasia.org](mailto:salma@migrasia.org) should you require any further information.

Sincerely,

A handwritten signature in black ink that reads "Salma Khaled".

**Salma Khaled Ali**  
**Technology Consultant**
